EDUCATION

University of Western Ontario

Sept 2022 – April 2026

BsC, Computer Science with Minor in Game Development - Dean's Honour List

London, ON

GPA 3.8

EXPERIENCE

Project Manager

July 2024 – Present

Western Tech for Social Impact

London, ON

- Responsible for leading 2 separate developer teams of 5+ members and managing portfolio projects for the TSI club at Western
- Working **with 7+ non-profit organizations** across the London-Middlesex county to develop tech projects to solve social issues, such as environmental concerns, charities, immigration and more

Co-Founder

May 2024 – August 2024

Stealth AI Startup

London, ON

- Established an AI startup whilst spearheading fundraising efforts, **amassing 20+ grants** into our portfolio
- Creating an anti-AI watermarking system using **4 different optimization algorithms**, including adversarial noise, disruptive patterns, subliminal embedding, and frequency manipulation
- Working with React and Shopify to create responsive webapps/websites, increasing exposure to our **products by 67%**
- Joined the **Entrepreneurial Summer Internship** program at the **Ivey Business School**, expanding funding and network

PROJECTS

United Way Stairclimb | *Python, Flask, React, Bootstrap*

[link](#)

- Developed a webapp for **United Way** to keep track of and visualize step data in their **Stairclimb event**
- Managed and formed a team of 6 developers, **increasing team productivity by 60 percent**
- Flask API** backend for data processing and admin configurations, and **React** frontend to parse and visualize data from StepUp app
- Webapp helped increase **participation to the event by 52%**

Memento | *Python, Taipy, HTML, CSS, Markdown, Cohere*

[link](#)

- Project for UoftHacks 2024, **won an award for 'Best use of Taipy'**
- Developed with **Taipy** for both frontend and backend to create time machines where users can store photos and stories
- Used **Cohere AI** to generate stories for each time machine based on the descriptions and photos given by the users

CodeSwitch | *Streamlit, Cloudflare, MongoDB*

[link](#)

- Developing a webapp with **Streamlit and Cloudflare** whose purpose is to translate any non-english terms into code
- Uses **MongoDB** to store any constantly used keywords by users, consistently expanding our database in order to accommodate any languages and their colloquialisms
- Existing support for more than 50 languages

Western TSI Website | *HTML5, CSS, React, Tailwind*

[link](#)

- Developed a website with **React and Tailwind** for the **Tech for Social Impact** club at Western
- Raised the web development front productivity within the club by **80 percent**, being responsible for over **1,000 changes** weekly
