EDUCATION & CERTIFICATIONS

University of Western Ontario

BsC, Computer Science with Minor in Game Development - Dean's Honour List

Sept 2022 – April 2027

London, ON

AWS Certified Cloud Practitioner

Amazon Web Services

July 2026

EXPERIENCE

Cloud Developer

Bank of Montreal

May 2025 – August 2026

Toronto, ON (Remote)

- Designed a **cost management automation** using **AWS Lambda** to identify idle and unused cloud resources, compiling them into an **S3**-stored deletion list to streamline resource cleanup and reduce cloud spend
- Developed the backend for an internal web service, hosted on **ECS**, that automates **Change Request (CR)** creation, cutting manual effort by enabling reusable **CR templates** and centralized **CTASK** tracking
- Built **EventBridge**-triggered validation checks with real-time **CloudWatch** alerts to automatically flag improperly formatted or incomplete CTASKs, improving data quality across change management workflows
- Contributed to a **centralized email service** using **AWS Lambda** and **SQS** to route payloads through an **IronPort** endpoint, enabling reliable, decoupled, organization-wide email delivery

Project Manager

Western Tech for Social Impact

July 2024 – August 2025

London, ON

- Responsible for forming and leading **2 separate teams of 5+ developers** and managing portfolio projects for the TSI club at Western
- Worked **with 7+ non-profit organizations** across the London-Middlesex county to develop tech projects to solve social issues, such as environmental concerns, charities, immigration and more

PROJECTS

United Way Stairclimb | *Python, Flask, React, Bootstrap*

[link](#)

- Developed a webapp for **United Way** to keep track of and visualize step data from StepUp in their **Stairclimb event**
- Flask API** backend for data processing and admin configurations, and **React** frontend to parse and visualize data from StepUp app

Fund Homecare Canada Grant Scraper | *React, Python, BeautifulSoup, Supabase*

[link](#)

- Developed a webapp for **Fund Homecare Canada** to search and collect grant data for their mission
- Uses **BeautifulSoup** to scrape grant data that is sent to **Supabase** database, and **React** frontend to visualize the collected data into a dashboard

Memento | *Python, Taipy, HTML, CSS, Markdown, Cohere*

[link](#)

- Project for UoftHacks 2024, **won an award for 'Best use of Taipy'**
- Developed with **Taipy** for both frontend and backend to create time machines where users can store photos and stories
- Used **Cohere AI** to generate storytelling descriptions of each time machine based on key terms and photos given by the users

CodeSwitch | *Streamlit, Cloudflare, MongoDB*

[link](#)

- Developing a web app with **Streamlit** and **Cloudflare** to translate non-English terms into code, using **MongoDB** to store commonly used keywords and continuously expand language support.

TECHNICAL SKILLS

Languages: Java, Python, C, C++, MySQL, JavaScript, HTML/CSS, Rust, Dart, Prolog, Assembly, R, SQL, Bash

Frameworks: Flutter, Node.js, Taipy, Tauri, React, Flask, Streamlit

Developer Tools: AWS, Git, Google Cloud Platform, Firebase, Linux, MongoDB, Figma, Excel, Unity

Libraries: pandas, NumPy, Java Swing, pygame, Tailwind, FlexJSON

Relevant knowledge: Cloud development, OOP, Algorithms, Data Structures, Machine Learning, Software Development Cycles, UX/UI Design, Databases, Operating Systems, Game design
